

THE ALPINE ADVANTAGE ON WHEAT

- ▶ Maximizes available phosphorus and potassium required for top yields
- ▶ Promotes quick, uniform emergence
- ▶ Seed safe at recommended rates
- ▶ Safe on plant foliage
- ▶ Tank-mix with glyphosates and fungicides
- ▶ Optimizes plant health
- ▶ Non-corrosive on planter/drill equipment and tanks
- ▶ Clean, easy handling

GIVE YOUR WHEAT THE ALPINE ADVANTAGE

the starter fertilizer company™

GO WITH THE LEADER ALPINE

- ▶ Highest quality liquid starter and foliar fertilizers
- ▶ Quality, precision placement, seed and foliar safe
- ▶ Low impurities
- ▶ Low salt
- ▶ True solution N-P-K
- ▶ Orthophosphate (available phosphorus)
- ▶ Highly soluble

ALPINE liquid starters and foliars have a neutral pH and are low in both salt index and impurities. These features of our liquid starters enable the product to be placed directly with the seed at planting time. Placement with the wheat seed allows the available phosphorus to be taken up at the critical early stages of growth to maximize yield potential.

Applying available nutrients of ALPINE foliar fertilizer on the plant foliage allows for immediate absorption into the plant in a very short period of time. This immediate uptake promotes better plant health and increased yield potential.

ALPINE liquid starters and foliars contain a high level of orthophosphate. Orthophosphate is immediately available to the plant during the critical early stages of growth. Plants can only take up phosphorus in the orthophosphate form.

GIVE YOUR WHEAT CROP THE ALPINE ADVANTAGE

Wheat has a critical need for phosphorus and potassium from germination through reproductive stages, where maximum yield potential is determined.

The ALPINE Advantage ensures that the wheat plant has adequate available phosphorus and potassium when the plant needs it most for maximum yield potential.

Give your wheat plant a strong and uniform emergence with ALPINE seed-placed starter. When used as a foliar fertilizer, and applied to the plant foliage, the nutrients are absorbed quickly throughout the plant for healthier wheat to maximize yields. ALPINE liquid fertilizers can also be tank-mixed with most post-spray applications to save wheat growers time and money!

For maximum yields and early season plant performance, give your wheat crop **The ALPINE Advantage**.

- ▶ Maximizes available phosphorus and potassium required for top yields
- ▶ Promotes quick, uniform emergence
- ▶ Seed safe at recommended rates
- ▶ Safe on plant foliage
- ▶ Tank mix with fungicides or other post application sprays
- ▶ Optimizes plant health
- ▶ Non-corrosive on planter/drill equipment and tanks
- ▶ Clean, easy handling

Sales and Service Advantage

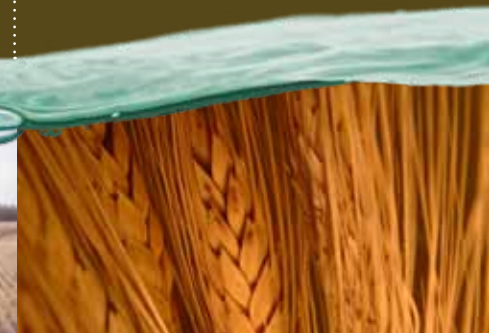

- ▶ Most experienced sales team in the business
- ▶ Direct support at farm level
- ▶ Large dealer network across the prairies

Equipment Support Advantage

- ▶ 35 years of equipment experience
- ▶ Inventory of storage tanks
- ▶ Application kits available for all makes and models of planters and drills

Logistics and Delivery Advantage

- ▶ Dedicated railcar fleet
- ▶ Deliveries of 70,000L per railcar
- ▶ Experienced logistics team
